

# Share Trip Feature Exploration Report

Website: [ShareTrip](#)

Prepared by: Ruma Akter

## 1. Trip Section: One Way

### 1) One-Way Button:

The button is clickable. When selected, its color changes to show that the one-way option is active.

### 2) From Field (Departure):

Users can click inside this field to search and select their departure airport.

### 3) To Field (Destination):

Users can click inside this field to search and select their destination airport.

### 4) Swap Button:

This button is fully functional. By clicking the swap icon, users can easily exchange the departure and destination locations.

### 5) Date Picker:

Clicking on the date field opens a calendar. Dates cannot be typed manually. Since this is a one-way trip, the return date option remains disabled. only future dates can be selected.

### 6) Traveller Selection:

This is a clickable dropdown where users can choose the number of passengers, including adults, children, kids, and infants.

### 7) Age Rules for Travellers

a) **Adults:** 12 years and above

b) **Children:** 5 years to under 12 years

c) **Kids:** 2 years to under 5 years

d) **Infants:** Under 2 years

## 8) Traveller Categories

### a) Adults:

The number of adults can be increased or decreased using the plus (+) and minus (–) buttons. At least **1 adult is required**, and a maximum of **7 adults** can be selected.

### b) Children:

Controlled using plus (+) and minus (–) buttons. Children must travel with adults. One adult can book tickets for up to **6 children**. Their pricing is different from adults.

### c) Kids:

One adult can book for a maximum of **6 kids**.

### d) Infants:

Also controlled using plus (+) and minus (–) buttons. The number of infants must be **equal to or less than the number of adults**. For example, if 7 adults are selected, a maximum of 7 infants is allowed.

### e) Total Traveller Count:

The total number of selected travellers is displayed at the top of the dropdown.

### f) Done Button:

Clicking the **Done** button confirms and applies the selected traveller details. This button works properly.

## 9) Search Button:

This button is clickable and starts the search for available one-way flights.

## 10) Class Selection:

Users can choose their preferred travel class: **Economy, Premium Economy, Business, or First Class**.

## 11) Fare Type Selection:

Users can select from **Regular Fare, Student Fare, or Umrah Fare**.

## 2. Trip Section: Round Trip

### 1. Round Trip Button:

The button is clickable, and its color changes when selected to show that the round-trip option is active.

### 2. From and To Fields (Route Selection):

Both fields are clickable and allow users to search and select their departure and destination airports.

### 3. Swap Button:

This button works properly and allows users to swap the departure and destination locations with one click.

### 4. Date Picker:

Dates are selected from a calendar, and manual typing is not allowed. For round trips, the **return date option is enabled** so users can choose both departure and return dates.

### 5. Traveller Selection & Categories:

Traveller selection follows the same rules as the One-Way option. This includes age limits for adults, children, kids, and infants, as well as the rule that the number of infants cannot be more than the number of adults.

### 6. Total Traveller Count:

The total number of selected travellers is clearly shown at the top.

### 7. Done and Search Buttons:

The **Done** button saves the selected traveller details, and the **Search** button starts the search for available round-trip flights.

### 8. Class and Fare Selection:

Users can choose their preferred travel class and select special fare options such as **Regular Fare, Student Fare, or Umrah Fare**.

## 3. Trip Section: Multi City

### 1. Multi-City Trip Button:

The button is clickable and changes color when selected to show that the multi-city option is active.

### 2. Route Selection:

Each flight segment has its own **From** and **To** fields. Users can click these fields to search and select airports for every route.

**3. Swap Button:**

The swap button is clickable and works properly, allowing users to reverse the departure and destination for a route.

**4. Date Picker:**

Dates are selected from a calendar, and manual date entry is not allowed.

**5. Add More Flight:**

Users can click the **Add More Flight** button to add another route to their trip.

**6. Remove Route:**

A **Remove (X)** button is available for each route, allowing users to delete any specific segment from the itinerary.

**7. Traveller Selection & Categories:**

Traveller rules remain the same as other trip types:

- a. Adults: Minimum 1, maximum 7
- b. Children: Up to 6 per adult
- c. Kids: Up to 6 per adult
- d. Infants: Cannot be more than the number of adults

**8. Class & Fare Selection:**

Users can choose their preferred travel class and fare type for the entire multi-city journey.

**9. Done & Search Buttons:**

The **Done** button saves the selected passenger details, and the **Search** button starts the search for available multi-city flights.
